S C A B I E S

A Centre was opened in May, 1942, for the out-patient treatment of Scabies cases from the Melton & Belvoir Rural and the Melton Mowbray Urban Districts. 148 cases were treated during the year.

## MELTON & BELVOIR RURAL DISTRICT

### Existing Water Supplies

The Parishes of Ab Kettleby, Asfordby, Broughton & Dalby Clawson & Harby, Stathern, Waltham (Thorpe Arnold Ward), Eaton, (Eastwell Ward) Somerby (part), Burton & Dalby (Burton Ward), are supplied from the Council's mains.

Stand pipes are not provided, the services being laid on to the consumers' premises.

There is no indication of any tendency to plumbo-solvency.

The Parishes of Belvoir, Buckminster (Buckminster Ward) Grimston, Saxelby Ward) Knossington (Cold Overton Ward), Sproxton, (Sproxton & Saltby Wards) are supplied by private piped supplies of limited quantity.

The rest of the District is supplied from public and private wells. The majority of the wells are 'shallow wells' of doubtful quality, and in many cases insufficient in quantity during dry periods. Shortages have been experienced particularly in the Parishes of Wymondham and Hoby.

In the village of Waltham-on-the-Wolds samples showed the wells to be heavily polluted and the water unfit for consumption without being previously boiled. A piped supply to this village should be provided with the least possible delay.
